

Baby's Journey Steps into a New Category: Revolutionizing Safety Gate Installation with the One Step Gate

Las Vegas, NV (October 15, 2013) – Baby's Journey, Inc., a new juvenile products manufacturer focused on delivering insightful solutions for parents, enters a new product category with the launch of the One Step Gate. Being presented at the All Baby and Child Expo in October 2013, the One Step Gate offers a modern stainless steel design with a one-step pressure mount installation. Unlike other gates of its kind, it takes only minutes to install and does not require tools.

Parents report that gates are often difficult and time consuming to install, and installing them incorrectly is dangerous. "We focused on simplifying gate installation with the development of our step and secure foot mechanism, a foot pedal at the base of the gate that will instantly pressure fit to the opening without tools or thread adjustments." says Steve Gibree, Founder and President/CEO of Baby's Journey.

The One Step Gate is 32" H and fits openings 30" – 46" W and includes a 4" and 8" extension. It also features a one-handed, double-locking handle. Not only great for keeping small children safe, but ideal for pets too. The One Step Gate is available at Buy Buy Baby for a suggested retail of \$89.99.
